

Beatriz Rodríguez Rivera

Narrativa de intercambio

My name is Beatriz and I am a student from LEI Bachelors degree of arts in English Language teaching in the Universidad de Guanajuato campus DICIS. I had the opportunity to study abroad for the spring semester 2015 in Juniata College in Huntingdon, PA, United States. From day one the staff made me feel included and part of Juniata, I felt very blessed to be in such beautiful campus and to be welcomed by an amazing staff. The orientation days helped us (the international students) to know us better and we instantly became good friends. Classes were great, all teachers were well prepared and I learned a lot from them. Teachers were always open to meetings and to review or give you advice on your assignments. Tutors were available for private sessions at all times with no extra cost. There was no way to fail, I felt so motivated and part of Juniata. Weekends were full of fun experiences too. Juniata offers lots of activities during the weekends, sports, cultural events and more. Being immersed in a new culture was scary, but an amazing experience at the same time, I learned a lot from the American culture and learned to be tolerant and adapt to new customs. Studying abroad was the best decision I could ever take and I will be forever thankful with everyone who made this experience possible.
